

Construction Management

This program fills a pressing need in the construction industry for individuals to conduct and manage activities within the construction industry. It has been developed with significant industry guidance and assistance. The industry experts are aware that there has been substantial growth in this industry, causing a shortage of individuals with the proper training due to a lack of alignment of academic programs and industry needs. The purpose of the construction management program is to provide students with a well rounded general education in written and verbal communication, mathematics, business, law, humanities, fine arts, and social, behavioral and natural sciences in preparation for a concentration in coursework that will prepare them for a career at management, administrative and ownership positions in the construction industry.

Career Opportunities for Construction Management
