

The Master of Arts in Counseling in Psychology program is currently **only** in alignment with the educational requirements put forth by the **California Board of Behavioral Sciences**. A **determination has not** been made as to whether the Master of Counseling in Psychology program meets the educational requirements for licensure to practice in any other state. This program requires a clinical training practicum which **must be completed within California**, and practicum sites must meet specific requirements from the BBS and be pre-approved by the University.

However, in order to become a Licensed California Marriage and Family Therapist (MFT) or Professional Clinical Counselor (PCC), students may have to have the necessary supervised experience and pass the appropriate examination. Please see the links above for more information.

Prospective and current students should keep in mind that relocating to another state **during or after** the program could impact their ability to meet the licensure or certification requirements of the relocating state. Students who wish to take a program out of the state they are relocating to must first get special approval.

Psy D.

We are approved to do internships in the following States:

Background checks – do one before they go into practicum – certain convictions can impact your ability to become licensed or be accepted to certain practicum sites

Ethnographic hours
